**Subject:** Jorgensen Forge Dewatering Box Waste Shipment Scheduling

Good Morning,

I need to schedule pickup and shipment of two 20 cy MP Environmental dewatering boxes, #5617 and #5453. These boxes are profile RXN00066. They were originally ordered through Clean Harbors, who had MP bring out the boxes. The boxes were originally ordered under #V0342.

I will need the **short-tail** truck to pickup each box at the Jorgensen Forge site and move it through a shared Boeing/Jorgensen side gate to the Plant 2 property. There (west side of the 2-81 building) a second truck should meet it to ship the boxes off from Plant 2 to the disposal facility.

Both trucks should plan to go to the truck inspection gate prior to entry to Jorgensen Forge and Plant 2.

I would like to schedule the pickups/shipments for **Thursday, 3/10/11** at 8am at the Jorgensen site for the short-tail truck and **8:30** am for the regular truck shipping the waste off-site.

Fred Wallace will be the on-site contact, 206-930-0461t, and Andy Howe should be listed so that he can print out the shipping manifests and placards for us.

***Jennifer Parsons***
